

SAFETY DATA SHEET

CONFORMS TO OSHA HAZARD COMMUNICATION STANDARD (HCS) 29 CFR 1910.1200

SECTION 1. IDENTIFICATION

Product identifier:	JAX Trolley-Glide FG-3H (Trigger Spray)					
Part number:	00146-007					
Identified uses:	Direct food-contact lubricant; release agent					
Uses advised against:	As a direct food-contact lubricant, there are no specific uses advised against. Potential uses advised against may be specified elsewhere in this SDS.					
Supplier:	Pressure-Lube Inc. JAX					
	W134 N5373 Campbell Drive Menomonee Falls, WI 53051 USA info@jax.com					
Email contact:						
Non-emergency	Phone: 262-781-7660 Fax: 262-781-3906					
contact:						
Emergency telephone:	INFOTRAC:

	International 011-1-352-323-3500 (collect) China 400-120-0761					
SECTION 2. HAZARD(S) IDENTIFICATION						
Classification :	While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS					

available for employees and other users of this product.

contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and

Label elements

Plctograms: Not applicable

Signal word:	Not applicable
Hazard statements:	Not applicable
Precautionary statements:	Not applicable
Hazards not otherwise classified:	Not applicable.

Additional information: Not applicable.

SECTION 3. COMPOSITION / INFORMATION ON INGREDIENTS

Composition:	Chemical name	<u>%</u>	<u>CAS #</u>	Impurities
	White mineral oil (petroleum), <20.5 cSt @ 40°C	<10	8042-47-5	None

SECTION 4. FIRST-AID MEASURES

First aid measures	
Eye contact:	Remove contact lenses, if wearing, and flush eyes with water for at least 15 minutes or until irritation subsides. If irritation persists, consult a physican.
Skin contact:	Remove clothing and shoes, if contaminated. Wash skin with soap and water. Wash or clean contaminated clothing before reuse and discard oil-soaked shoes. If irritation persists, consult a physician.
Ingestion:	If swallowed, DO NOT induce vomiting. As a precaution, give the person a glass of water to drink and seek medical attention. Never give anything by mouth to an unconscious person. Consult a physician.
Inhalation:	Remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention immediately.
Most important symptoms and effects, both acute and delayed:	No further relevant information available.
Indication of any immediate medical attention and special treatment available:	No further relevant information available.
General information:	No further relevant information available.

SECTION 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media:	Extinguishing media include dry chemical, alcohol foam, and carbon dioxide. Do not use direct stream of water. Water may be used to keep fire-exposed containers cool.
<u>Unsuitable</u> extinguishing media:	Do not use direct stream of water.
Specific hazards:	Pressure build-up due to heat exposure may cause containers to rupture. Use water spray to keep contianers cool.
Advice for firefighters:	Firefighters should wear full protective gear, including helmet. Use supplied-air breathing equipment for enclosed or confined space or as otherwise needed.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:	In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. Keep away from ignition sources. Wear protective equipment. Keep unprotected persons away.					
Environmental precautions:	Prevent entry into sewers, waterways or confined areas by diking or impounding. Dike far ahead of spill for later recovery and disposal. Advise authorities if the product has entered or may enter sewers, watercourses, or extensive land areas.					
<u>Methods for</u> <u>containment and</u> <u>cleaning up</u>	 Land spill: Stop leak if you can do so without risk. Recover free product using non-sparking tools. Add sand, earth, or other suitable absorbent material to the spill area. Recover by pumping or with suitable absorbents. Dispose of in accordance with national and/or local regulations relating to waste disposal. Water spill: Stop leak if you can do so without risk. Confine the spill immediately with booms. Remove from the surface by skimming or with suitable absorbents. 					
SECTION 7. HANDLING ANI	SECTION 7. HANDLING AND STORAGE					

Precautions for safe handling:	Keep away from heat and direct sunlight. Ensure good ventilation/exhaustion at the workplace.
<u>Conditions for safe</u> <u>storage, including any</u> <u>incompatibilities</u> :	Store in a cool, dry place in tightly sealed containers. Store out of direct sunlight. Do not store near heat, sparks, open flame, pilot lights, static electricity, or other sources of ignition. Do not store where temperature may exceed 49°C (120°F). Store away from oxidizing agents. Rotate stock.

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION					
Workplace exposure	Chemical name	Exposure limit and source			
<u>limits:</u>	White mineral oil (petroleum), <20.5 cSt @ 40°C	5 mg/m³ (oil mist), TWA, ACGIH			
Exposure controls					
Engineering controls:	Provide exhaust ventilation or other engineering controls occupational exposure limits.	ventilation or other engineering controls to keep the airborne concentration of vapors below their respective posure limits.			
Ventilation:	e in a well-ventilated area. See Engineering Controls.				
Personal hygiene:	S I	oroughly after contact, before breaks and meals and at the end of the work period. Product is readily removed waterless hand cleaners followed by washing thoroughly with soap and water.			
Eye protection:	Chemical splash goggles or face shield in compliance with OSHA regulations are advised when eye contact may occur.				
Hand protection:	Any lined non-permeable rubber gloves.				
Respiratory protection:	Respiratory protection: Use with adequate ventilation. Respiratory protective equipment is not normally required where there is adequate natur local exhaust ventilation to control exposure. In case of insufficient ventilation, wear suitable respiratory equipment. A NIOSH/MSHA-approved air-supplied respirator is advised in absence of proper environmental control.				

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance / odor:	Amber lube oil with mild fatty acid odor	Upper flammability limit:	Not available
		Lower flammability limit:	Not available
Physical state:	Liquid	Vapor pressure:	Negligible
Odor threshold:	Not available	Vapor density:	A
<u>pH</u> :	Not available		Not available
Melting / freezing point:	Not available	Relative density:	0.88 (typical)
Initial boiling point	Not available		
and boiling range:		Solubility in water:	Negligible
Flash point:	367°F (186°C), ASTM D 92	Partition coefficient (n-octanol/water):	Not available
