## SECTION 5. FIRE-FIGHTING MEASURES

<b><u>Suitable extinguishing media:</u></b>	Extinguishing media include dry chemical, alcohol foam, and carbon dioxide. Do not use direct stream of water. Water may be used to keep fire-exposed containers cool.
<b><u>Unsuitable extinguishing media:</u></b>	Do not use direct stream of water.
<b><u>Specific hazards:</u></b>	Pressure build-up due to heat exposure may cause containers to rupture. Use water spray to keep containers cool.
<b><u>Advice for firefighters:</u></b>	Firefighters should wear full protective gear, including helmet. Use supplied-air breathing equipment for enclosed or confined spaces or as otherwise needed.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

<b><u>Personal precautions, protective equipment and emergency procedures</u></b>	In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. Keep away from ignition sources. Wear protective equipment. Keep unprotected persons away.
<b><u>Environmental precautions:</u></b>	Prevent entry into sewers, waterways or confined areas by diking or impounding. Dike far ahead of spill for later recovery and disposal. Advise authorities if the product has entered or may enter sewers, watercourses, or extensive land areas.
<b><u>Methods for containment and cleaning up</u></b>	<b>Land spill:</b> Stop leak if you can do so without risk. Recover free product using non-sparking tools. Add sand, earth, or other suitable absorbent material to the spill area. Recover by pumping or with suitable absorbents. Dispose of in accordance with national and/or local regulations relating to waste disposal. <b>Water spill:</b> Stop leak if you can do so without risk. Confine the spill immediately with booms. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

## SECTION 7. HANDLING AND STORAGE

<b><u>Precautions for safe handling:</u></b>	Keep away from heat and direct sunlight. Ensure good ventilation/exhaustion at the workplace.
<b><u>Conditions for safe storage, including any incompatibilities:</u></b>	Store in a cool, dry place in tightly sealed containers. Store in out of direct sunlight. Do not store near heat, sparks, open flame, pilot lights, static electricity, or other sources of ignition. Do not store where temperature may exceed 49°C (120°F). Store away from oxidizing agents. Rotate stock.

## SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

<b><u>Workplace exposure limits:</u></b>	<b><u>Chemical name</u></b>	<b><u>Exposure limit and source</u></b>
	Mineral oil	5 mg/m <sup>3</sup> (mist), OSHA
	Molybdenum disulfide	Short-term value = 20 mg/m <sup>3</sup> , as Mo Long-term value = 10 mg/m <sup>3</sup> , as Mo
	Graphite	15 mg/m <sup>3</sup> , OSHA TWA

### **Exposure controls**

<b>Engineering controls:</b>	Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective occupational exposure limits.
<b>Ventilation:</b>	Use in a well-ventilated area. See Engineering Controls.
<b>Personal hygiene:</b>	Wash skin thoroughly after contact, before breaks and meals and at the end of work period. Product is readily removed from skin by waterless hand cleaners followed by washing thoroughly with soap and water.
<b>Eye protection:</b>	Chemical splash goggles or face shield in compliance with OSHA regulations are advised when eye contact may occur.
<b>Hand protection:</b>	Any lined non-permeable rubber gloves, made of material such as neoprene
<b>Respiratory protection:</b>	Use with adequate ventilation. Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure. In case of insufficient ventilation, wear suitable respiratory equipment. A NIOSH/MSHA-approved air-supplied respirator is advised in absence of proper environmental control.
